## IN THE CLAIMS:

Claims 1-4. (Cancelled)

 (Currently Amended) A method for producing a stabilized hydroalkoxysilane, said method comprising the steps of:

providing a hydroalkoxysilane;

providing a carboxylate;

combining the carboxylate with the hydroalkoxysilane in a container to form the stabilized hydroalkoxysilane; and

sealing the container to form a sealed container containing the stabilized hydroalkoxysilane; and

separating the carboxylate from the hydroalkoxysilane.

- 6. (Previously Presented) The method according to claim 5, wherein the carboxylate is an alkali metal salt or an alkali earth metal salt of a carboxylic acid having 1 to 18 carbon atoms.
- 7. (Previously Presented) The method according to claim 6, wherein the alkali metal salt or alkali earth metal salt of a carboxylic acid has 1 to 5 carbon atoms.
- 8. (Previously Presented) The method according to claim 7, wherein the alkali metal salt or alkali earth metal salt of a carboxylic acid having 1 to 5 carbon atoms is selected from the group

consisting of sodium formate, sodium acetate, sodium propionate, sodium butyrate, sodium valerate or pentanoate, sodium oxalate, potassium formate, potassium acetate, magnesium acetate.

- 9. (Currently Amended) The method according to claim 5, wherein the carboxylate coexists with the hydroalkoxysilane in an amount of 0.0001 to 10 parts by weight per 100 parts by weight of the hydroalkoxysilane prior to separation.
- 10. (Previously Presented) The method according to claim 5, wherein the hydroalkoxysilane is a trialkoxysilane.
- 11. (Previously Presented) The method according to claim 10, wherein the trialkoxysilane is a trimethoxysilane or a triethoxysilane.
- 12. (Previously Presented) The method according to claim 5, wherein the hydroalkoxysilane is an alkyldialkoxysilane.
- 13. (Previously Presented) The method according to claim 12, wherein the alkyldialkoxysilane is a methyldimethoxysilane or a methyldiethoxysilane.

Docket No. 071051.00027

14. (Currently Amended) A stabilized hydroalkoxysilane comprising a combination of a

hydroalkoxysilane and a carboxylate, wherein said stabilized hydroalkoxysilane is stored and

transported in a sealed container and wherein said carboxylate is separated from said

stabilized hydroalkoxysilane prior to use of said hydroalkoxysilane as a reagent, starting

material, or additive.

15. (Previously Presented) The stabilized hydroalkoxysilane according to claim 14,

wherein said carboxylate is an alkali metal salt or an alkali earth metal salt of a carboxylic

acid having 1 to 18 carbon atoms.

16. (Previously Presented) The stabilized hydroalkoxysilane according to claim 15,

wherein said alkali metal salt or alkali earth metal salt of a carboxylic acid has 1 to 5 carbon

atoms.

17. (Previously Presented) The stabilized hydroalkoxysilane according to claim 16,

wherein said alkali metal salt or alkali earth metal salt of a carboxylic acid having 1 to 5

carbon atoms is selected from the group consisting of sodium formate, sodium acetate,

sodium propionate, sodium butyrate, sodium valerate or pentanoate, sodium oxalate,

potassium formate, potassium acetate, magnesium acetate, and calcium acetate.

H&H 071051.00027 Serial No. 10/566,027 - 4 -

18. (Previously Presented) The method according to claim 5, wherein said step of

combining the carboxylate with the hydroalkoxysilane in the container to form the stabilized

hydroalkoxysilane is further defined as adding the carboxylate to the hydroalkoxysilane.

19. (Previously Presented) The method according to claim 5 further comprising the step of

mixing the stabilized hydroalkoxysilane.

20. (Previously Presented) The method according to claim 5 further comprising the steps of

storing and transporting the sealed container.

21. (Previously Presented) The method according to claim 20, wherein the stabilized

hydroalkoxysilane is stored and transported in the sealed container without a loss of purity

and chemical changes.

22. (Previously Presented) The method according to claim 20, wherein the stabilized

hydroalkoxysilane is stored and transported in the sealed container without a pressure rise in

the sealed container.

23. (Previously Presented) The method according to claim 21, wherein the stabilized

hydroalkoxysilane is stored and transported in the sealed container without a pressure rise in

the sealed container.

H&H 071051.00027 Serial No. 10/566,027 - 5 -

Docket No. 071051.00027

24. (Currently Amended) The stabilized hydroalkoxysilanemethod according to claim 5,

wherein the carboxylate ean beis separated from the hydroalkoxysilane through filtration.

25. (Previously Presented) The stabilized hydroalkoxysilane according to claim 14 wherein

said stabilized hydroalkoxysilane is stored and transported in the sealed container without a

loss of purity and chemical changes.

26. (Currently Amended) The method stabilized hydroalkoxysilane according to claim 14,

wherein said stabilized hydroalkoxysilane is stored and transported in the sealed container

without a pressure rise in the sealed container.

27. (Currently Amended) The method stabilized hydroalkoxysilane according to claim 25,

wherein said stabilized hydroalkoxysilane is stored and transported in the sealed container

without a pressure rise in the sealed container.

28. (Currently Amended) The stabilized hydroalkoxysilane according to claim 14 wherein

said carboxylate ean beis separated from said hydroalkoxysilane through filtration.

29. (Currently Amended) A method for producing a stabilized hydroalkoxysilane, said method

comprising the steps of:

H&H 071051.00027 Serial No. 10/566,027 - 6 -

providing a hydroalkoxysilane;

providing a carboxylate;

adding the carboxylate to the hydroalkoxysilane in a container to form the stabilized hydroalkoxysilane;

mixing the stabilized hydroalkoxysilane; and

sealing the container to form a sealed container containing the stabilized hydroalkoxysilane; and

separating the carboxylate from the hydroalkoxysilane.

30. (Previously Presented) The method according to claim 29, wherein said step of mixing is further defined as stirring and/or shaking the stabilized hydroalkoxysilane.

31. (Previously Presented) The method according to claim 29 further comprising the steps of storing and transporting the sealed container.
